Professional Summary

AI-focused full-stack developer with hands-on experience building production-ready web apps, AI-powered tools, and automation systems. Experienced in FastAPI, Python backend development, and AI integrations including NLP and LLM-based systems. Proven track record of delivering real-world products through startups and freelancing, including full-stack deployments and scalable backend systems.

Technical Skills

Programming Languages: Python, Java

Backend: FastAPI, Flask, REST APIs

Frontend: TailwindCSS, JavaScript, HTML

Databases: MySQL, Supabase

Cloud & DevOps: Azure, AWS basics, Docker

AI/ML: OpenCV, TensorFlow basics, NLP, LLM APIs

Tools: Git, VS Code, Figma, Postman

Professional Experience

Argozen (Freelance) | november-2025

Full Stack Developer | Product Manager

- Built and deployed full-stack web solutions for client projects
- Developed responsive frontend interfaces and scalable backend APIs
- Integrated third-party APIs and optimized performance for real-world usage

Jobspring - On-site

CMO & Full Stack AI Developer | January 2025 – June 2025

Key Responsibilities:

- Built AI resume generator with OpenAI GPT, delivering 50+ tailored resumes
- Developed GPT + ElevenLabs interview coach with 95% engagement
- Created FastAPI + React app supporting 1000+ concurrent users
- Optimized backend performance and reduced API latency by 30% through efficient database queries
- Deployed scalable APIs via Docker, Azure App Service, and Blob Storage, cutting deployment time by 60%

Key Technologies: Python, FastAPI, React, OpenAI GPT, ElevenLabs, MongoDB, Azure App Service, Azure Blob

Project Work

Wanderlust-appointments-booked

Smart Appointment Booking and Consultancy **Key Features:**

- Appointment Booking System – Built a client-side form with validation to allow users to book appointments seamlessly.
- FastAPI Backend Integration – Connected the frontend with a FastAPI backend for handling appointment requests and responses.
- Database Connectivity – Implemented persistent storage of bookings to track and manage appointments effectively.
- Admin Dashboard – Designed a management panel to view, approve, and manage booked appointments.
- User-Friendly Frontend – Developed a responsive UI with TailwindCSS for smooth user interaction and mobile compatibility.
- API Routing & Data Handling – Implemented structured API endpoints in FastAPI to handle CRUD operations for appointments.

Tech Stack: FastAPI, Python, TailwindCSS, JavaScript
